DETAILED ACTION

Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Allowable Subject Matter

- 2. Claims 1-3 are allowed.
- The following is an examiner's statement of reasons for allowance: The Prior arts 3. fails to teach a method of driving a plasma display panel, the panel comprising: a plurality of data electrodes disposed on a second substrate, confronting the first substrate with a discharge space therebetween, such that the data electrodes are placed in a direction crossing the display electrode pairs, wherein the display electrode pairs confront the data electrodes for forming primary discharge cells, and the priming electrodes confront the data electrodes for forming priming discharge cells, wherein one field comprises a plurality of subfields each one of the sub-fields including an initializing period, an addressing period, and a sustaining period, wherein the addressing period includes an oddline addressing period in which an address operation is conducted to primary discharge cells having odd-number scan electrodes, an even-line addressing period in which an address operation is conducted to primary discharge cells having even-number scan electrodes, wherein during the odd-line addressing period, a scan pulse voltage is applied to odd-number scan electrodes

Application/Control Number: 10/573,935

Art Unit: 2629

sequentially while a priming pulse voltage is applied, prior to the application of the scan pulse voltage, to a priming electrode adjacent to the scan electrode to which the scan pulse voltage is to be applied, in order to generate a priming discharge between the priming electrodes and the data electrodes, and wherein during the even-line addressing period, a scan pulse voltage is applied to even-number scan electrodes sequentially while a priming pulse voltage is applied, prior to the application of the scan pulse voltage, to a priming electrode adjacent to the scan electrode to which the scan pulse voltage is to be applied, in order to generate a priming discharge between the priming electrodes and the data electrodes as claimed in Claim 1.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
